Feeding Directions

- **Supplemental food items may be provided.** Mature or elderly rabbits may benefit from supplemental food items with lower calcium and protein (ex. grass hay). Growing, gestating, and lactating rabbits may benefit from food items with higher calcium and protein (ex. alfalfa hay).
- Rabbits maintained in breeding colonies with high rates of breeding may benefit from a diet with enhanced energy density.
- Thoroughly wash feed and water bowls on a regular basis. It is always good practice to wash hands after feeding and/or handling pets. This diet is not for human consumption.
- See table (below, right) for dietary composition when feeding different levels & types of hay.
- Provide plenty of fresh clean water at all times.

Storage Conditions

For best results, reseal the bag between uses or store contents of open sack in container with sealing lid. Store in a cool (75°F/24°C or colder), dry (approximately 50% RH) location free from rodents and insects. Do not offer moldy or insect-infested feed to animals as it may result in illness, performance loss or death. Freezing will not harm the diet and may extend freshness. Use within 1 year of bag manufacturing or "Best if Used By" date.
