

Flamingo Breeder Diet

Mazuri® Flamingo Breeder Diet can be fed as the staple diet to flamingos, cranes, and other crustacean-eating birds. As the primary portion of the birds' daily food intake, it is designed to maintain the birds' vibrant plumage color when fed according to directions.

Features and Benefits

- **Floating diet** – Allows for feeding of bird in the water and prevents accumulation on the bottom of the feeding area, limiting water contamination and waste (pellet form only).
- **Ground diet available** – For birds or management conditions that require small particle size.
- **Nutritionally balanced** – Contains high levels of vitamins and fish proteins.
- **Sustainable fish meal source used.**

Product Form & Packaging

- **Catalog #0005482** | Extruded Particle | 1/4" x 3/8" | 50 lb. (22.67 kg) net weight paper w/poly bag
- **Catalog #0006593** | Meal | 50 lb. (22.67 kg) net weight paper w/poly bag

Ingredients

Dehydrated Alfalfa Meal, Corn Gluten Meal, Ground Wheat, Fish Meal, Wheat Flour, Brewers Dried Yeast, Porcine Meat and Bone Meal, Dehulled Soybean Meal, Porcine Animal Fat Preserved with BHA and Citric Acid, Sodium Sesquicarbonate, Soybean Oil, Shrimp Meal, Calcium Carbonate, L-Lysine, DL-Methionine, Salt, Pyridoxine Hydrochloride, Spirulina Algae Meal, Magnesium Oxide, Vitamin D3 Supplement, d-Alpha Tocopheryl Acetate (Vitamin E), Canthaxanthin (color), Folic Acid, Calcium Iodate, Vitamin A Supplement, Choline Chloride, Preserved with Mixed Tocopherols, L-Ascorbyl-2-Polyphosphate (Vitamin C), Biotin, Manganous Oxide, Rosemary Extract, Thiamine Mononitrate, Calcium Pantothenate, Riboflavin Supplement, Citric Acid (a Preservative), Vitamin B12 Supplement, Zinc Oxide, Inositol, Ferrous Carbonate, Menadione Sodium Bisulfite Complex (Vitamin K), P-Aminobenzoic Acid, Copper Sulfate, Nicotinic Acid, Potassium Chloride, Zinc Sulfate, Sodium Selenite, Cobalt Carbonate.

Feeding Directions

- Mazuri® Flamingo Breeder Diet can be fed as a major part of the birds' daily food intake during the breeding season (spring and summer months).
- The feed can be scattered directly on shallow water, or it can be fed in a long, shallow trough, which will prevent the food from floating away from the birds.
- Adult birds will usually eat 150 – 200 grams/day.
 - Increase amount of product offered if managed birds compete for the feed with other non-collection birds such as starlings and seagulls.
- For non-breeding flamingos, use Mazuri® Flamingo Complete Diet.
- Always provide plenty of fresh, clean water.
- Thoroughly wash feed and water bowls on a regular basis. It is always good practice to wash hands thoroughly after feeding and/or handling animals.
- This diet is not for human consumption.

Storage Conditions

For best results, reseal the bag between uses or store contents of open paper sack in container with sealing lid. Store in a cool (75°F/24°C or colder), dry (approximately 50% RH) location free from rodents and insects. Do not offer moldy or insect-infested feed to animals as it may result in illness, performance loss or death. Freezing will not harm the diet and may extend freshness. Use within 1 year of bag manufacturing or "Best if Used By" date.
