

NutriBlend Gold® Pigeon Diet

Mazuri® NutriBlend Gold® Pigeon Diet is part of the NutriBlend Feeding System, which allows you to take control of your pigeons’ diet. The NutriBlend Feeding System is a combination of two products: Mazuri® NutriBlend Gold® and NutriBlend Green®. Mazuri® NutriBlend Gold® Pigeon Diet is a higher fat, lower protein diet while Mazuri® NutriBlend Green® Pigeon Diet is higher in protein and lower in fat. By blending the two products together, you regulate the protein and fat levels of your birds’ diet while maintaining optimum levels of nutrients, allowing you to create a personalized diet catered to your pigeons’ specific needs.

Features and Benefits

- **Extruded, grain shaped particle** – Durable and palatable particle that keeps fines to a minimum.
- **Higher fat diet** – As compared to NutriBlend Green® Pigeon Diet.
- **Customizable feeding system** – Can be blended with NutriBlend Green® Pigeon Diet to create the ideal blend of protein and fat for every situation.
- **Designed for pigeons** – No supplementation required.

Product Form & Packaging

Catalog #3007656-706 | Extruded Particle | 3/16” diameter | 50 lb. (22.67 kg) net weight poly bag

Feeding Directions

- Feed to pigeons as much as will be consumed in 20 – 30 minutes twice daily.
- Designed to be blended as needed with NutriBlend Green® Pigeon Diet to achieve suggested feeding programs depending upon the type of bird (racing or show), age of bird, season, and situation.
- Supply fresh, clean water at all times.
- The chart below gives general recommendations on how to blend NutriBlend Green® and NutriBlend Gold® Pigeon Diets to achieve optimum performance depending on the type of bird (racing or show), age of bird, season, and situation.

- Important:
 - Do not feed extra trace mineral supplements since this will produce excessively loose droppings.
 - Plain grit and oyster shell may be fed but are not necessary.
 - Feeding extra grain will dilute NutriBlend Gold® Pigeon Diet's scientifically balanced nutrition, so additional supplementation is not recommended.
 - Thoroughly wash feed and water bowls on a regular basis. It is always good practice to wash hands thoroughly after feeding and/or handling animals.
 - This diet is not for human consumption.
-

Storage Conditions

For best results, reseal the bag between uses or store contents of open paper sack in container with sealing lid. Store in a cool (75°F/24°C or colder), dry (approximately 50% RH) location free from rodents and insects. Do not offer moldy or insect-infested feed to animals as it may result in illness, performance loss or death. Freezing will not harm the diet and may extend freshness. Use within 1 year of bag manufacturing or "Best if Used By" date.
