

Moose Breeder Diet

Mazuri® Moose Breeder Diet is a concentrated feed designed to approximate the nutrient density of natural foods while providing the nutrition needed to keep animals in good condition during reproductive phases.

Features and Benefits

- **Starch-reduced** – To approximate natural foods.
- **Fortified with vitamins and minerals** – Provides nutritional balance needed.
- **Highly palatable** – Animals will readily consume without excessive weight gain.
- **Pellet form** – Easy to feed; minimizes waste.

Product Form & Packaging

Catalog #0005499 | Pellet | 5/32" x 1/2" | 40 lb. (18.14 kg) net weight paper w/poly bag

Guaranteed Analysis

Crude protein not less than	16.00%	Calcium not more than	1.35%

Crude fiber not more than	25.00%	Salt not less than.....	0.50%
Ash not more than	9.00%	Salt not more than.....	1.00%
Calcium not less than.....	0.85%	Sodium not more than.....	0.55%

Ingredients

Dehulled Soybean Meal, Ground Aspen, Dehydrated Alfalfa Meal, Dried Beet Pulp, Cane Molasses, Oat Hulls, Soybean Oil, Sucrose, Dicalcium Phosphate, Salt, Magnesium Oxide, Choline Chloride, Calcium Carbonate, L-Ascorbyl-2-Polyphosphate (Stabilized Vitamin C), Pyridoxine Hydrochloride, Cholecalciferol (Form of Vitamin D3), Vitamin A Acetate, D-Alpha Tocopheryl Acetate (Form of Vitamin E), Folic Acid, Calcium Iodate, Menadione Sodium Bisulfite Complex (source of Vitamin K), Calcium Pantothenate, Copper Sulfate, Biotin, Vitamin B-12 Supplement, Zinc Oxide, Thiamine Mononitrate, Nicotinic Acid, Riboflavin Supplement, Cobalt Carbonate, Manganous Oxide, Ferrous Carbonate, Zinc Sulfate, Sodium Selenite.

Feeding Directions

- Feed to animals ad libitum along with appropriate browse and roughage.
 - Beginning in early summer, introduce Mazuri® Moose Breeder Diet by mixing increasing amounts into the maintenance diet.
 - By late summer, the breeder diet should be the only source of concentrated feed available.
 - In late autumn, begin adding the maintenance diet to the animal's breeder diet by mixing increasing amounts, until mid-winter, when the maintenance diet should be the only source of concentrate offered.
- Always provide plenty of fresh, clean water.
- Thoroughly wash feed and water bowls on a regular basis. It is always good practice to wash hands thoroughly after feeding and/or handling animals. This diet is not for human consumption.

Caution: Contains more than 15 ppm copper – If using for sheep species ensure to balance the complete diet for total copper intake.

Storage Conditions

For best results, reseal the bag between uses or store contents of open paper sack in container with sealing lid. Store in a cool (75°F/24°C or colder), dry (approximately 50% RH) location free from rodents and insects. Do not offer moldy or insect-infested feed to animals as it may result in illness, performance loss or death. Freezing will not harm the diet and may extend freshness. Use within 1 year of bag manufacturing or "Best if Used By" date.
