

Shark & Ray Gel Diet

Mazuri® Shark & Ray Gel Diet is designed for the feeding of sharks and rays. This diet is shipped as a powder that is designed to be made into a gel prior to feeding.

Features and Benefits

- **Soft-moist texture of gel** – More palatable to fish which are difficult to feed.
- **Contains all vitamins and trace minerals known to be required by elasmobranchs.**
- **Contains added iodine** – To meet the needs of sharks and rays.
- **Multiple sustainable fish meal sources used.**

Product Form & Packaging

Catalog #1812226 | Dry Powder | Order by the kg.

Guaranteed Analysis (dry powder)

Crude protein not less than	55.00%	Calcium not less than.....	3.00%
Crude fat not less than.....	15.00%	Calcium not more than	4.00%
Crude fiber not more than	2.00%	Phosphorus not less than	2.00%
Moisture not more than	10.00%	Sodium not more than.....	0.87%
Ash not more than	16.00%	Sulfur not more than	0.80%

Ingredients

Menhaden Meal, Salmon Meal, Fish Oil, Gelatin, Spirulina Algae Meal, Anhydrous Betaine, Calcium Iodate, Xanthan Gum, Choline Bitartrate, L-Ascorbyl-2-Polyphosphate (Vitamin C), Taurine, Inositol, Tagetes (Aztec Marigold) Extract (Color), Thiamine Mononitrate, Nicotinic Acid, Zinc Oxide, Calcium Pantothenate, Manganous Oxide, Calcium Carbonate, DL-Alpha Tocopheryl Acetate (Vitamin E), D-Alpha Tocopheryl Acetate (Vitamin E), Ferrous Carbonate, Canthaxanthin (color), Copper Sulfate, Menadione Sodium Bisulfite Complex (Vitamin K), Preserved with Mixed Tocopherols, Riboflavin-5-Phosphate, Pyridoxine Hydrochloride, Citric Acid (a Preservative), Astaxanthin (Color), Beta Carotene, Folic Acid, Zinc Sulfate, Vitamin A Acetate, Calcium Iodate, Biotin, Cobalt Carbonate, Rosemary Extract, Cholecalciferol (Vitamin D3), Vitamin B12 Supplement.

Feeding Directions

NEVER FEED DRY PRODUCT.

- Combine by weight 60% boiling water and 40% Mazuri® gel powder. Adjust ratios to desired texture and need.
 - Mix fully, pour into shallow pan. Refrigerate until firm. Cut to desired size and feed.
- Intake of up to 50% prepared Mazuri® gel is recommended.
- Always provide plenty of fresh, clean water.
- Prepared gel should be consumed or discarded within 24 hours or stored no longer than 7 days under refrigeration or up to 1 month frozen. If frozen, it is recommended that frozen batches be individually sealed in amount of usage, as repeated entry into the container exposes gel to oxygen.
- Thoroughly wash feed and water bowls on a regular basis. It is always good practice to wash hands thoroughly after feeding and/or handling animals. This diet is not for human consumption.

Storage Conditions

Mazuri® Gel Diets have a 1-year shelf life in the dry powder form when stored in a dry environment. For best results, tightly affix lid on canister after removal of desired dosage or store contents of open bags in container with sealing lid. Store in a cool (75°F/24°C or colder), dry (approximately 50% RH) location free from rodents and insects. Do not feed moldy or insect-infested feed to animals as it may cause illness, performance loss or death. The mixed product should be stored under refrigeration for no longer than 7 days or frozen for up to 1 month. It is recommended that frozen batches be individually sealed in amount of usage, as repeated entry into the container exposes gel to oxygen. Once this product is mixed, it should be handled like raw food.
