Feeding Directions

- Tortoises will generally consume 1% to 4% of body weight per day (total diet), although food intake will vary due to environmental temperature, activity, and life stage.
- Provide good quality forage such as grass hay or non-toxic browse and fresh, clean water daily.
- It is not necessary to moisten pellets with water; however, soaking the product may help to acclimate tortoises to the diet. If moistened, the diet should be replaced at least twice daily.

Recommended Feeding Guide

| Tortoise Weight | Daily Amount* |
|------------------------|-----------------------------|
| 1 lb. (450 g) | 1 tbsp – 1/4 cup (5 – 20 g) |
| 5 lb. (2.3 kg) | 1/4 – 1 cup (20 – 90 g) |
| 10 lb. (4.5 kg) | 1/2 – 2 cups (45 – 180 g) |
| 20 lb. (9 kg) | 1 – 4 cups (90 – 360 g) |

*Suggested amounts; adjust to individual animal needs.

- Thoroughly wash feed and water bowls on a regular basis. It is always good practice to wash hands thoroughly after feeding and/or handling animals.
- This diet is not for human consumption.

Storage Conditions

For best results, reseal the bag between uses or store contents of open paper sack in container with sealing lid. Store in a cool (75°F/24°C or colder), dry (approximately 50% RH) location free from rodents and insects. Do not offer moldy or insect-infested feed to animals as it may result in illness, performance loss or death. Freezing will not harm the diet and may extend freshness. Use within 1 year of bag manufacturing or "Best if Used By" date.
