Feeding Directions

- This diet is intended for breeding and growing crickets and may also be used as a maintenance diet for adult crickets.
- Feed free-choice as the sole diet. Feed should always be made available.
- Discard and replace uneaten food after 24 hours or if feed becomes wet or soiled.
- Always provide insects with a hydration source.
- If offering liquid water, do so in a very shallow dish to prevent animal mortality.
- For proper gut-loading prior to feeding crickets to insectivorous animals, use Mazuri® High Calcium Gut Loading Meal.

Storage Conditions

For best results, store contents of open paper sack in container with sealing lid. Store in a cool (75°F/24°C or colder), dry (approximately 50% RH) location protected from rodents and insects. Do not feed moldy or insect-infested feed to animals as it may result in performance loss, illness or death. Freezing will not harm the diet and may extend freshness. Use within 1 year of bag manufacturing.
