Feeding Directions

- Feed to koi and goldfish under 6 inches in length.
- Feed 1 – 3 times per day and only as much as fish will readily consume in 5 minutes.
 - Do not overfeed, as excess feed will decompose in the water resulting in poor water quality, which may be harmful to the health of your fish.
- For the same nutrition in a different particle size, consider:
 - Mazuri® Koi Platinum Nuggets - suitable for koi and goldfish from six to twelve inches long.
 - Mazuri® Koi Platinum Ogata - suitable for fish over twelve inches long.
- When feeding multiple sizes of fish, choose a particle size the smaller fish will be able to eat.
- This diet is not for human consumption.

Storage Conditions

For best results, reseal the bag between uses or store contents of open paper sack in container with sealing lid. Store in a cool (75°F/24°C or colder), dry (approximately 50% RH) location free from rodents and insects. Do not offer moldy or insect-infested feed to animals as it may result in illness, performance loss or death. Freezing will not harm the diet and may extend freshness. Use within 1 year of bag manufacturing or "Best if Used By" date.
