

Bird of Prey Gel Diet

Mazuri[®] Bird of Prey Gel Diet is a balanced bird of prey food containing vitamin E along with menhaden fishmeal. When mixed, it is similar to raw meat in texture and designed to meet the needs of a variety of birds of prey in managed care. This diet is shipped as a powder that is designed to be made into a gel prior to feeding.

Features and Benefits

- **Nutritionally balanced** – No vitamin and mineral supplementation needed.
- **Soft, wet gel** – Similar to raw meat in texture and highly palatable.
- **Contains menhaden meal** – A sustainable source of fishmeal.
- **Convenient storage** – 1 year shelf life in the powder form.

Ash not more than	12.00%	Sulfur not more than.....	0.70%

Ingredients

Chicken Meal, Poultry By-Product Meal, Porcine Meat and Bone Meal, Gelatin, Dried Plain Beet Pulp, Fat Poultry Stabilized Bulk, Brewers Dried Yeast, Wheat Germ, Menhaden Meal, Locust Bean Gum, Casein, Fish Oil, Dicalcium Phosphate, Xanthan Gum, Carrageenan, Taurine, Lecithin, Potassium Chloride, Dextrose, Spirulina Algae Meal, Choline Bitartrate, Inositol, Tagetes (Aztec Marigold) Extract (Color), Magnesium Oxide, D-Alpha Tocopheryl Acetate (Vitamin E), Zinc Oxide, Calcium Carbonate, Manganous Oxide, Salt, Preserved with Mixed Tocopherols, Thiamine Mononitrate, Ferrous Carbonate, Citric Acid (a Preservative), Copper Sulfate, Nicotinic Acid, Calcium Pantothenate, Beta Carotene, Vitamin A Acetate, Riboflavin Supplement, Menadione Sodium Bisulfite Complex (Vitamin K), Pyridoxine Hydrochloride, Folic Acid, Zinc Sulfate, Calcium Iodate, Rosemary Extract, Calcium Iodate, Biotin, Cobalt Carbonate, Cholecalciferol (Vitamin D3), Vitamin B12 Supplement, Sodium Selenite.

Feeding Directions

NEVER FEED DRY PRODUCT.

- Combine by weight 70% boiling water and 30% Mazuri[®] gel powder. Adjust ratios to desired texture and need.
 - Mix fully, pour into shallow pan. Refrigerate until firm. Cut to desired size and feed.
- Intake of up to 50% prepared Mazuri[®] gel is recommended. Feed intake will vary based on age, body size and reproductive status.
- If feeding meat or prey items, ensure that they are nutritionally complete by using appropriate supplements.
- Always provide plenty of fresh, clean water.
- Prepared gel should be consumed or discarded within 24 hours or stored no longer than 7 days under refrigeration or up to 1 month frozen.
- If frozen, it is recommended that frozen batches be individually sealed in amount of usage, as repeated entry into the container exposes gel to oxygen.
- Thoroughly wash feed and water bowls on a regular basis. It is always good practice to wash hands thoroughly after feeding and/or handling animals. This diet is not for human consumption.

Storage Conditions

Mazuri[®] Gel Diets have a 1-year shelf life in the dry powder form when stored in a dry environment. For best results, tightly affix lid on canister after removal of desired dosage or store contents of open bags in container with sealing lid. Store in a cool (75°F/24°C or colder), dry (approximately 50% RH) location free from rodents and insects. Do not feed moldy or insect-infested feed to animals as it may cause illness, performance loss or death. The mixed product should be stored under refrigeration for no longer than 7 days or frozen for up to 1 month. It is recommended that frozen batches be individually sealed in amount of usage, as repeated entry into the container exposes gel to oxygen. Once this product is mixed, it should be handled like raw food.
