---

### Feeding Directions

Note: This is a specialized diet for maned wolves only.

- Change the animal's diet gradually by mixing this diet with the current diet.
- Increase the proportion of this diet each day until the animals are completely switched over.
  - The amount of food consumed will vary with the animal's level of activity, physiological state, and environment. Active animals may require more feed to maintain condition.
  - It is recommended that the Maned Wolf SSP Nutrition Advisor be a primary contact for any feeding questions.
- Always provide plenty of fresh, clean water.
- Thoroughly wash feed and water bowls on a regular basis. It is always good practice to wash hands thoroughly after feeding and/or handling animals.
- This diet is not for human consumption.

---

### Storage Conditions

For best results, reseal the bag between uses or store contents of open paper sack in container with sealing lid. Store in a cool (75°F/24°C or colder), dry (approximately 50% RH) location free from rodents and insects. Do not offer moldy or insect-infested feed to animals as it may result in illness, performance loss or death. Freezing will not harm the diet and may extend freshness. Use within 1 year of bag manufacturing or "Best if Used By" date.
