Feeding Directions

- Bearded Dragon Diet should make up at least 50% of your reptile's intake.
- Free feed juvenile and adult insect eating animals. Adult bearded dragons will typically eat 1 tablespoon (6-8 g) per day. Food intake will vary due to environmental temperature, activity, and life stage.
- Initially, soaking Bearded Dragon Diet in water (2 parts water:1 part dry diet) may help to transition animals that are used to soft/moist diets.
- After 1-2 weeks on soaked diet, move to 1 part water: 1 part dry diet, and 1-2 weeks later, offer dry diet.
- Supplemental food items like insects, produce and meat should be provided to your reptile. Visit Mazuri.com for more recommendations.

Storage Conditions

For best results, ensure polybag seal is fully closed during storage. Store in a cool (75°F or colder), dry (approximately 50% RH) location. Freezing will not harm the diet and may extend freshness. Adhere to the “Best if used by” date.
