Feeding Directions

- Feed free choice to growing or active animals. The amount of food consumed will vary with the animal's level of activity, physiological stage, and environment.
 - For body weight maintenance or low-activity animals, consumption will be approximately (based upon the animal's current body weight):

| ANIMAL WEIGHT, LB. | MAZURI® EXOTIC CANINE DIET, G (OZ) |
|--------------------|------------------------------------|
| 20 | 205 (7.2) |
| 30 | 305 (10.7) |
| 50 | 500 (17.6) |
| 70 | 695 (24.5) |

- Active animals may require more feed to maintain condition.
 - Breeding and lactating animals should be fed free choice, but body weight should be monitored during gestation. If the animal begins to gain excessive weight, feed should be limited.
- To transition to Mazuri® Exotic Canine Diet, change the animal's diet gradually by mixing in the Mazuri® diet with the animal's current diet. Increase the proportion of Mazuri® diet each day until the animal is completely switched over.
- Always provide plenty of fresh, clean water.
- Thoroughly wash feed and water bowls on a regular basis. It is always good practice to wash hands thoroughly after feeding and/or handling animals.
- This diet is not for human consumption.

Storage Conditions

For best results, reseal the bag between uses or store contents of open paper sack in container with sealing lid. Store in a cool (75°F/24°C or colder), dry (approximately 50% RH) location free from rodents and insects. Do not offer moldy or insect-infested feed to animals as it may result in illness, performance loss or death. Freezing will not harm the diet and may extend freshness. Use within 1 year of bag manufacturing or "Best if Used By" date.
