Feeding Directions

- Feed ad libitum or intake may be limited when free-choice hay or grass pasture is made available.
- Expected intake should be 33 to 50% of the diet, as fed. Offer hay and/or browse at a level to provide the remainder of the diet.
 - Animals generally should be fed 1-3% of body weight per day, although the amount of diet the animal requires will vary according to its species, age, size, life stage, health status and activity of the animal and the environmental temperature.
- Recommended for exotic ruminants over 50 kg. Ruminant under 50 kg may benefit from Mazuri[®] Wild Herbivore Plus Diet which is more energy dense.
- Always provide animal with plenty of fresh, clean water.
- Thoroughly wash feed and water bowls on a regular basis. It is always good practice to wash hands thoroughly after feeding and/or handling animals.
- This diet is not for human consumption.
