Storage Conditions

For best results, tightly affix lid on canister after removal of desired dosage or store contents of open paper sack in container with sealing lid. Store in a cool (75°F or colder), dry (approximately 50% RH) location protected from rodents and insects. Do not feed moldy or insect infested feed to animals, as it may result in performance loss, illness or death. Freezing will not harm the diet and may extend freshness. Use within 1 year of manufactured date.
