

Wild Herbivore Boost Supplement

Mazuri® Wild Herbivore Boost Supplement is a high energy, low starch herbivore supplement designed to promote weight gain in animals with poor body condition.

Features and Benefits

- **High energy/low starch diet** – Provides additional calories to animals with poor body condition, while maintaining them on a low starch dietary program.
- **Highly digestible** – Extrusion provides easy digestion and absorption.
- **Contains Omega-3 and Omega-6 fatty acids** – Promotes optimal lipid profiles.

Diet developed in collaboration with Disney's Animal Kingdom

Product Form & Packaging

Catalog #0006992 | Extruded Particle | 1/4" x 3/4" | 25 lb. (11.33 kg) net weight paper w/poly bag

Guaranteed Analysis

Crude protein not less than.....	12.00%	Phosphorus not less than.....	0.50%

Feeding Directions

- **Recommended intake is not more than 25% of the total diet, or to maintain total fat intake at 6% of the diet or less per day.**
- This supplement is designed to be fed in addition to a complete diet of pellets and forage.
- Begin feeding a small amount of the supplement daily.
- Gradually increase intake by 0.25-0.5 lb./day until desired feeding rate is reached.
- A slow transition is important.
 - When transitioning quickly, high fat levels of the supplement can cause gastrointestinal problems.
- Always provide plenty of fresh, clean water.
- Thoroughly wash feed and water bowls on a regular basis. It is always good practice to wash hands thoroughly after feeding and/or handling animals.
- This diet is not for human consumption.

Contains more than 15 ppm copper: If using for sheep species, ensure to balance the complete diet for total copper intake.

Caution: Follow label directions: Feeding added selenium at levels in excess of 0.3 ppm in total diet is prohibited.

Storage Conditions

For best results, reseal the bag between uses or store contents of open paper sack in container with sealing lid. Store in a cool (75°F/24°C or colder), dry (approximately 50% RH) location free from rodents and insects. Do not offer moldy or insect-infested feed to animals as it may result in illness, performance loss or death. Freezing will not harm the diet and may extend freshness. Use within 1 year of bag manufacturing or "Best if Used By" date.
